DETAILED ACTION

Response to Amendment

1. Applicant's amendment dated September 28, 2006 in which claims 15, 17, 27 and 30 were amended has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 15, 17, 27, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsukamoto (U.S. Pat. 5554859).

Regarding claims 15, 17, 27, and 30, Tsukamoto [Figs.3A-B] discloses a method for fabricating a semiconductor wafer with a patterned contact point [3007; col.19 lines 17-20] comprising gold, comprising:

ion milling said patterned contact point for cleaning said patterned contact point; wherein said ion milling said patterned contact point comprises using argon [Col.19 lines 22-23];

a method for fabricating a semiconductor wafer, comprising:

depositing a patterned metal bump [3007] on a topmost patterned circuit layer of said semiconductor wafer, wherein said patterned metal bump has a substantially flat top surface; and

Art Unit: 2822

ion milling said patterned metal bump for cleaning said metal bump [Col.19 lines 22-23];

wherein said ion milling said patterned metal bump comprises using argon [Col.19 lines 22-23].

Response to Arguments

3. Applicant's arguments filed September 28, 2006 have been fully considered but they are not persuasive. Applicant states that the ion milling process of Tsukamoto does not disclose cleaning the patterned contact point or metal bump. This is respectfully traversed. The ion milling process of Tsukamoto does disclose cleaning the patterned contact point or metal bump at least because the process removes extraneous undesired gold layer in order to form the desired shape. In any case, the scope of the claim is not limited to a cleaning process because the limitation "for cleaning said patterned contact point (metal bump)" is an intended use of the ion milling process, and the ion milling process of Tsukamoto is capable of being utilized for the intended use. Applicant's arguments are not persuasive, and therefore the rejection is maintained and is made final.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2822

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bac H. Au whose telephone number is 571-272-8795. The examiner can normally be reached on Mon-Fri 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zandra Smith can be reached on 571-272-2429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
